

Whitepaper

SafeXRP Crypto

safexcrypto.com

About

SafeXRP is a token that was born to innovate in DeFi investments. We are a futuristic token with big plans for the crypto market.

SafeXRP, also called SafeX, pays dividends to token holders. This passive income is paid in XRP for holding your digital assets.

SafeX also has automatic rebuy implemented, and the objective is clearly to improve liquidity and price on the chart. SafeX can also rebase, which means the price can always go up using the rebase function, which also helps in increasing liquidity.

SafeXRP was born to do the best for those who invest and trust in the project. Dividends are paid as a way to repay holders.

Among our plans are strong marketing for price growth, launch of dex-farm platforms, launch a game on blockchain and also launch a very futuristic themed metaverse.

Tokenomics

Name: **SafeXRP**

Symbol: **SafeX**

Decimals: **9**

Contract:

Pre sale link:

Supply: 100.000.000

20% initial burn

35% placed on pre-sale

5% of the tokens are for developers

Fees: 15%

7% of fees are paid to holders

1% is used to buy back and improve the token price on the chart

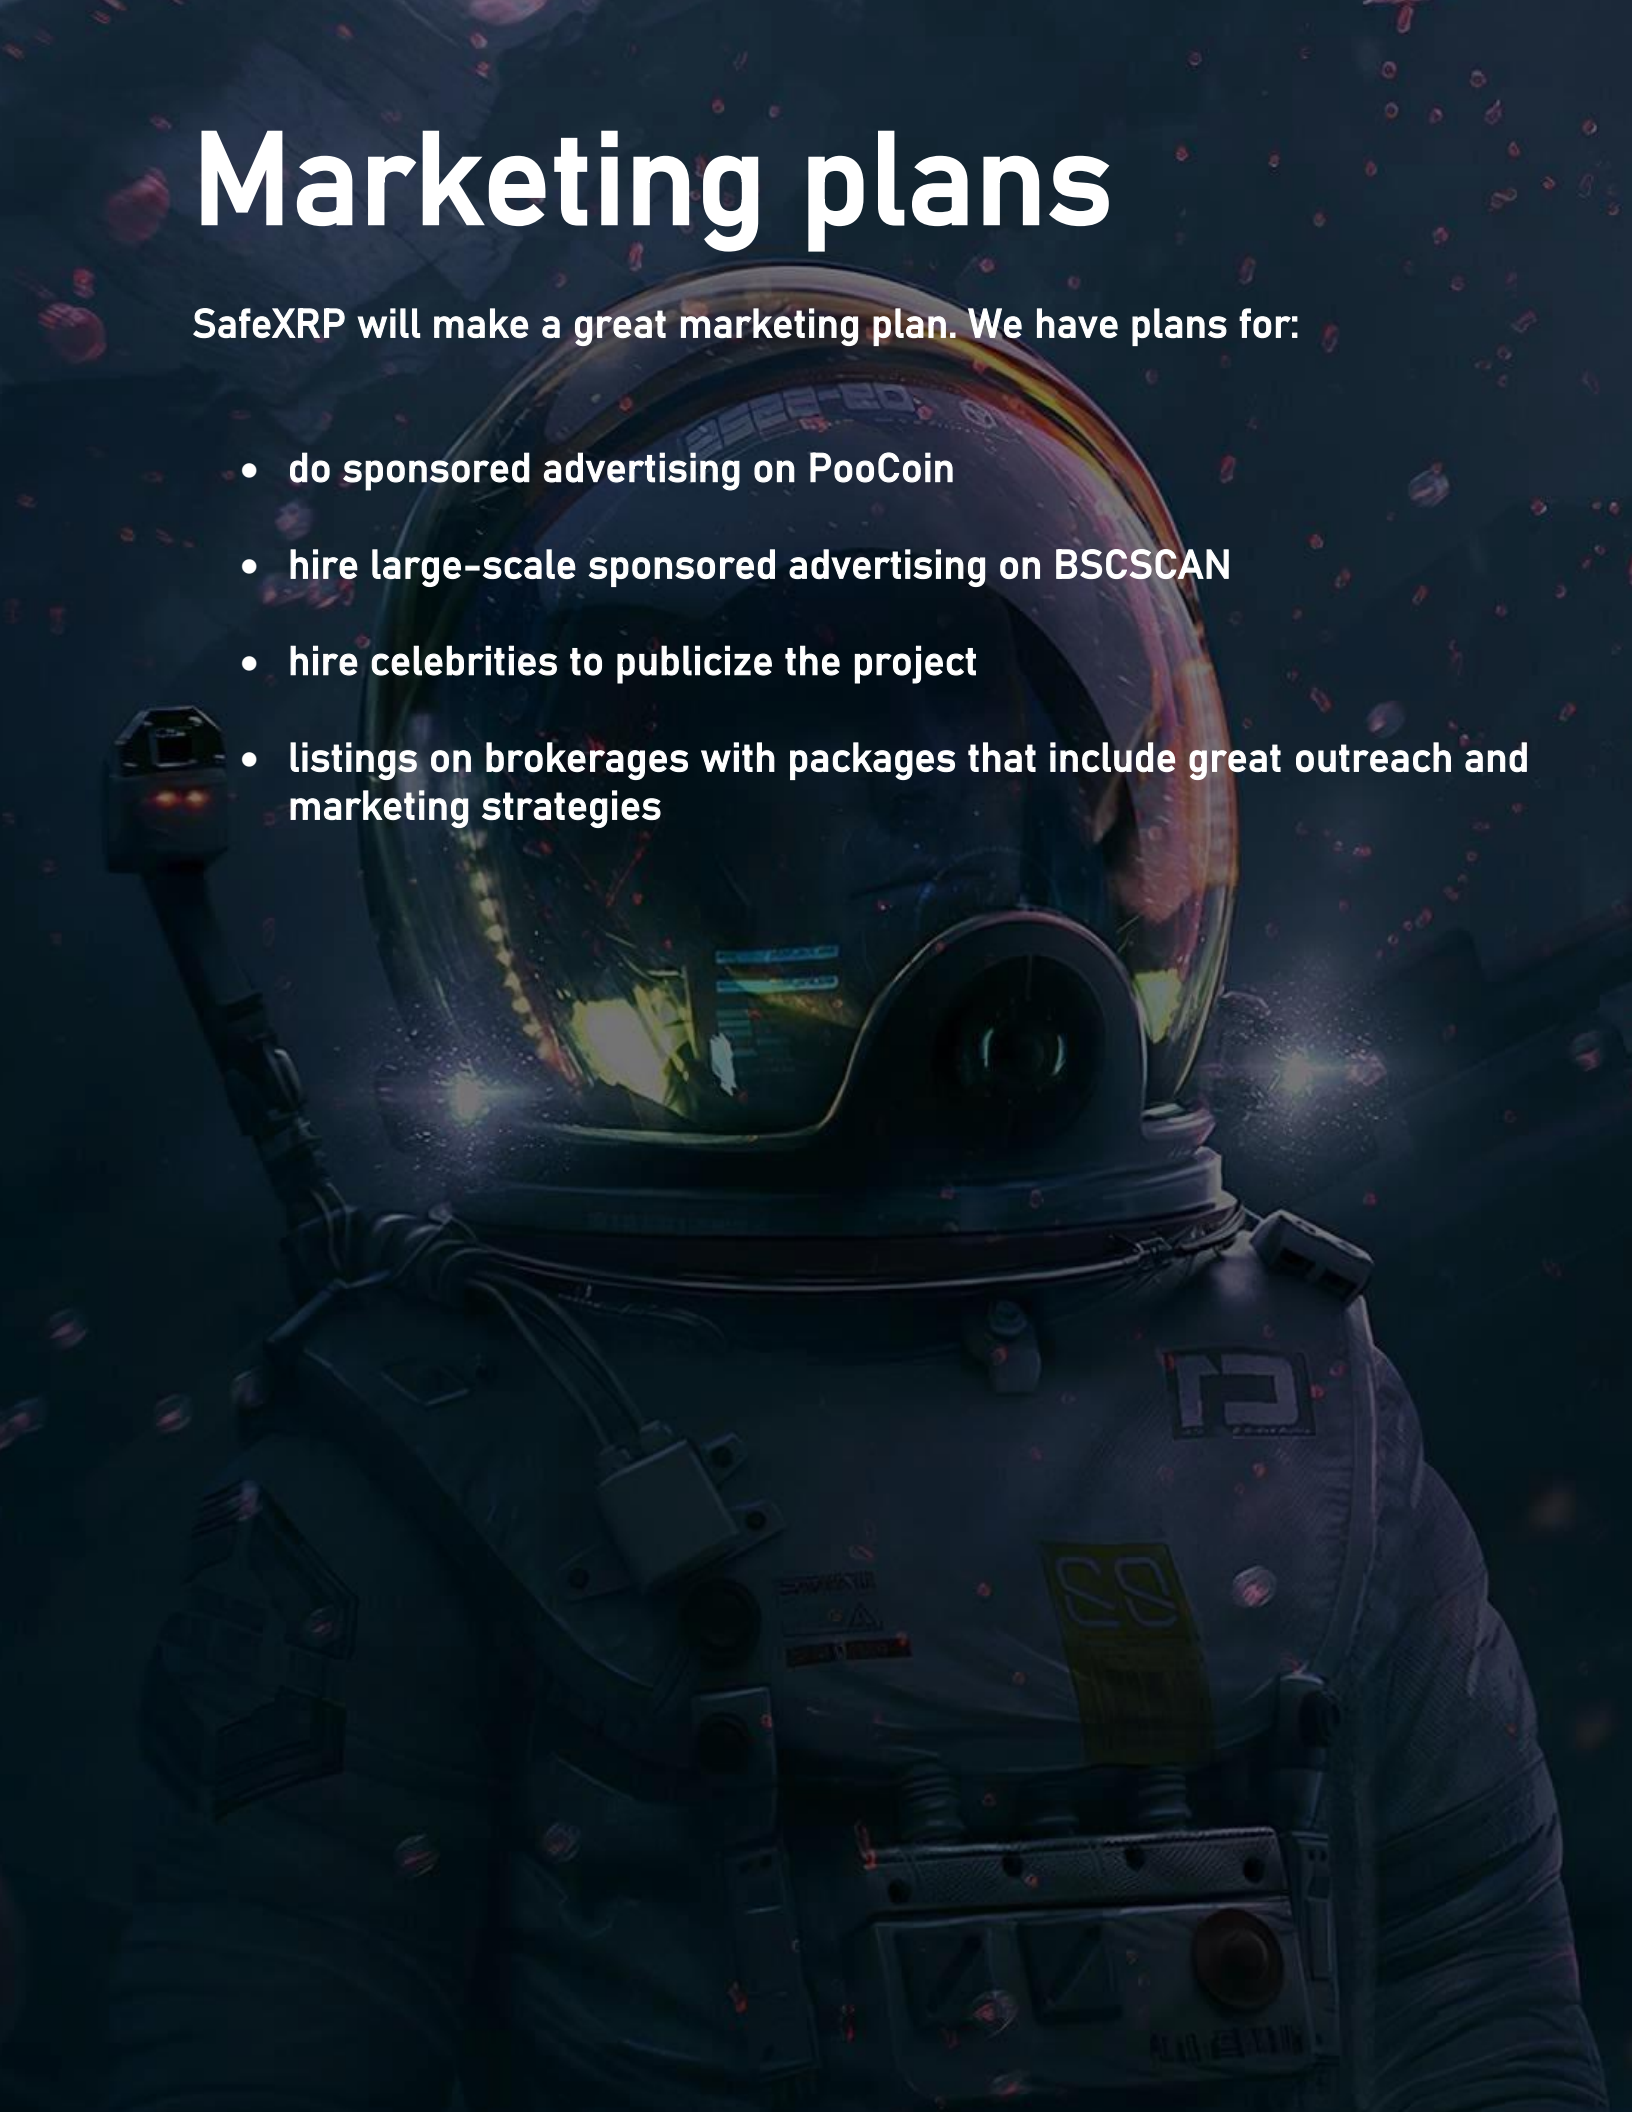

7% is used to fund marketing and aggressive growth of the token

Dividends paid in XRP

Marketing plans

SafeXRP will make a great marketing plan. We have plans for:

- do sponsored advertising on PooCoin
- hire large-scale sponsored advertising on BSCSCAN
- hire celebrities to publicize the project
- listings on brokerages with packages that include great outreach and marketing strategies

Creations

Game on blockchain

SafeXRP is already working on creating its game on the blockchain. The game will be on Ethereum, BSC and Solana protocols. The player will be able to earn rewards by playing and reaching the goals. The game environment will be places of the universe, mars, moon, spaceships, space wars.

SafeX's team of developers is already creating the basic structure of the game and has already started, however, in order to deliver something that can be played we will need to increase our team of software engineers and still pay for everything that involves the game. Gaming is our number one priority right now.

Metaverse

SafeX has plans to create its metaverse soon. When we finish the game on blockchain we will start SafeX Metaverse.

In the virtual reality of the metaverse it will be possible to earn rewards by playing and reaching the goals. The game environment will be places of the universe, mars, moon, spaceships, space wars.

NFT Collections

NFT collections will be created to accompany the game on the blockchain and the metaverse. The NFT will have futuristic arts and images.

Farm platform

We also have plans to make a farm platform available to provide functionality and facilities for investors. All investors will be happy to see their tokens earning them more money when farmed.

Gifts and rewards for holders

In addition to the dividends paid in XRP to everyone, we will be distributing tokens to project holders. This serves as a form of recognition for being with us.

Airdrops will also be performed frequently.

We also have plans to distribute NFT free of charge to SafeX holders.

Most of the profits generated through the game, the metaverse and the farm platform will be distributed to the investors, because it is the investors that make SafeX such a big project.

Roadmap

Phase 1

website creation

Token creation

Launch of pre-sales at DxSale

Phase 2

Big marketing focused on growing the project and increasing the price

SafeX Blockchain Game Improvements

Listing on CoinMarketCap

Listing on Coingecko

Phase 3

Exchanges listings

Finishing and Launching the Game

More marketing for group growth and price growth

Phase 4

Start creating the metaverse

Start creating the farm platform

Conclusion

SafeX is a great project for today. We envision a great future in the universe we live in. The creation of the game, the dex platforms, and the metaverse will be fulfilled according to our roadmap.

We thank all investors for making this project more and more a reality.
